SACHIN SONAWANE

SENIOR SOFTWARE ENGINEER

Results-driven Senior Java Developer with 5.4 years of experience architecting high-performance, scalable microservices for enterprise fintech and healthcare systems. Led a 15-member cross-functional team to launch Ops360, boosting Pan-India ATM uptime from 85% to 93% and cutting response times by 83% using Redis. Proficient in Java 8, Spring Boot, Kafka, Microservices, Docker, and REST APIs. Passionate about clean architecture, team mentorship, and delivering engineering solutions that create real business value. technologies like HTML, TypeScript, and AngularJS, as well as version control tools such as Git and Bitbucket. Collaborative team player with excellent communication skills, dedicated to delivering clean and efficient code.

SKILLS

Java 8 Features	Docker	Apache Camel
Core Java	Git, Github	Jira
Spring boot	Kafka	Junit , Mockito
Spring Data Jpa	Redis Cache	Swagger
Microservices	Hibernate Framework	Basic Html & TypeScript
REST API	Collection Framework	Basic AngularJS
MS-SQL / ORACLE 11g / PostgreSQL	Postman	Eclipse/STS

WORK EXPERIENCE

Senior Java Developer

nStore Retech Pvt. Ltd. (Hitachi Payment Services Pvt. Ltd.) *Feb 2024 - Present*

Ops360 is an enterprise middleware solution developed for **Hitachi Payments** to manage and maintain **Pan-India ATMs**. The project includes a **mobile app (Flutter)** for **Channel Executives (CEs)** in the field and a **web application (Flutter)** for **Channel Managers (CMs)** and higher management. The main objective of the project is to streamline the **end-to-end ATM lifecycle** — from **ATM onboarding** to making them operational, followed by continuous **maintenance, monitoring, and issue resolution**, **boosting ATM uptime from 85% to 93% within 3 months of launch**.

- Designed and developed the middleware application and web platform from scratch, implementing a **Microservices Architecture**.
- **Integrated RESTful APIs** from existing systems for ATM onboarding and connecting third-party services.
- **Developed and deployed microservices** for core functionalities such as ticketing, ATM service management, dashboards, phonebooks, Knowlarity integration, and location services.
- **Used Feign Client for internal communication** between microservices, replacing the need for manual REST calls using **RestTemplate**.
- Utilized **Spring Data JPA ORM** to automate mapping between SQL databases and Java objects, streamlining data access layers.
- Integrated **Apache Kafka** as a **queuing mechanism** for reliable and asynchronous event handling. All **tickets generated against ATMs** are first published to Kafka topics and then persisted to the database, ensuring **scalability, fault tolerance, and data consistency**.
- Debugged and optimized stored procedures to improve application performance
- Integrated third-party **Knowlarity RESTful APIs** to enable advanced calling and call log functionalities, improving communication capabilities within the application.
- Managed version control with **GitHub** and deployed **Dockerized** apps across Dev, UAT, and Production on **Linux**.
- Partnered with the frontend team to provide well-structured APIs and ensure smooth integration with the Android app and web platform
- Conducted unit and integration testing, resolving production issues to ensure operational continuity
- Troubleshoot complex issues within existing software applications
- Mentored junior developers, conducted code reviews, created technical documentation, and trained end users.
- Reduced server response time by **83%**, from 1 min to under 10 sec, by implementing Redis cache.
- Wrote unit and integration tests using JUnit and Mockito, achieving high code coverage and ensuring regression-free deployments.
- Tracked progress using Scrum methodology, delivering projects on time within fast-paced environments.

Senior Software Engineer

CitiusTech Healthcare Technology Private Limited *Oct 2020 - Feb 2024*

HealthRules Payors (Presbyterian Healthcare Services)

HRP performs inbound and outbound data processes, receiving data from vendors in various formats (EDI,XML, Excel). The data is processed, enriched using PL/SQL queries and stored in a database. Using Spring boot,Apache Camel, Spring Data Jpa, and ActiveMQ, the data is further enhanced and written to files in differentformats before being moved to specific output folders for vendor pickup.

- Designed and developed new interfaces from scratch, using Business Requirement Documents (BRDs) as a guide.
- **Developed Technical Design Documents (TDDs)** for both existing and new interfaces, ensuring that they met all requirements and were well-documented.
- Contributed to enhancement & bug fixes for existing projects. Identified and resolved production issues, ensuring that existing projects operated smoothly and efficiently.
- Conducted regression and unit testing using **JUnit** and **Mockito** on all code changes, ensuring zero new bugs were introduced.
- Used Jira to create and track development tickets, ensuring that projects were well-organized, and that progress was made on time.
- **Identified and fixed PL/SQL bugs** and created DDL and DML scripts as needed.
- **Deployed code changes to Bitbucket using Git** commands, ensuring that the code was secure and accessible to all team members.
- Excellent problemsolving and analytical skills

EDUCATION

Bachelor of Engineering

Sardar Patel Institute of Technology *Aug 2017 - Jun 2020*

CGPA 8.28

Diploma Engineering

Veermata Jijabai Technological Institute *Aug 2014 - Jun 2017*

84.81%

Secondary School Certificate

Chikitsak Samuh Shirolkar High School *Jun 2004 - Apr 2014*

90%

AWARDS

Star Of Month

nStore (Hitachi Payments Pvt. Ltd.) *2025-05-01*

Recognized as **Star of the Month** for my leadership in spearheading a cross-functional team of 15, including 6 backend, 4 frontend, and 5 support professionals. My efforts ensured the project was delivered successfully and all commitments were met.

Commended for outstanding contributions

Citiustech *2023-07-20*

Commended for outstanding contributions on HRP Interfaces Managed Services Project, with notable achievements in resolving issues for HRP Member Eligibility to HealthX and maintaining project metrices. Appreciated for positive attitude and dedication on 20/07/2023

Technical Presentation and Patent Drafting

SPIT *2019-03-29*

First Runner Up in department level “Technical Presentation and Patent Drafting” conducted by Sardar Patel Institute of Technology on 29/03/2019
